Tektronix 4404

- Motorola 68010 32bit microprocessor
- 1 Mbyte high-speed dynamic RAM memory
- Virtual memory management for 8 Mbyte address space
- 640x480 monochrome, bit-mapped display
- 1024x1024 display bit-map with smooth panning
- 40 Mbyte, 5.25" hard disk and 320 Kbyte, 5.25" floppy disk
- (option) Franz LISP programming language
- (option) Prolog programming language
- (option) EMACS Editor

Boostnote

The screenshot displays the Boostnote application window. On the left is a dark sidebar with navigation options: 'All Notes' (2), 'Starred' (0), 'Trash' (2), 'My Storage' (expanded), 'Default' (2), and 'MyWorks' (0). The main area is divided into three sections. The top section is a 'Search' bar with a dropdown menu showing 'Updated', 'Snippet note example', and 'No tags'. Below this is a list of notes, with the first note 'Welcome to Boostnote!' selected. The bottom section shows the content of the selected note, which is a markdown document. The note content includes a heading 'Welcome to Boostnote!', a subheading 'Click to edit this note.', a paragraph about Boostnote being an open source note-taking app, and a list of features. The features list includes 'No internet or registration required' (checked) and 'Quick search and copy the content of note' (unchecked). The note also mentions the repository is published on GitHub and the user is tweeting everyday on @Boostnoteapp. The note is 20% zoomed in, as indicated by the '20%' label in the top right corner of the note editor.

Welcome to Boostnote!

Click to edit this note.

Boostnote is an *open source* note-taking app. Repository is published on [\[GitHub\]](https://github.com/BoostIO/Boostnote) (<https://github.com/BoostIO/Boostnote>), and tweeting everyday on [@Boostnoteapp](https://twitter.com/boostnoteapp) (<https://twitter.com/boostnoteapp>)!

Features

- ☒ No internet or registration required.
- ☐ Quick search and copy the content of note. macOS: `<kbd>Cmd</kbd> + <kbd>A</kbd> + <kbd>C</kbd>`

Click to edit this note.

Boostnote is an *open source* note-taking app. Repository is published on [GitHub](#), and tweeting everyday on [@Boostnoteapp](#)!

Features

- ☒ No internet or registration required.
- ☐ Quick search and copy the content of note. macOS: `<kbd>Cmd</kbd> + <kbd>A</kbd> + <kbd>C</kbd>`

# IntelliJ IDEAを中心にIDEを探る

IntelliJ IDEA Community Editionがオープンソ
  ースとして公開されてから約8年たちました。
  以前はIDE（統合開発環境）と言えばEclipseが主流
  だったはずなのに、
  いつの間にかIntelliJ IDEAの利用者が大幅に増え
```

On the right is the rendered slide, titled "ユーザー増加中のIntelliJ IDEAを中心にIDEを 探る". It contains the same text as the code editor, but with the following changes:

- The list of speakers and organizers is bulleted.
- The URL <https://github.com/kmaeda/OscNagoya2018> is a blue link.
- The Creative Commons license image is replaced by a CC BY-SA icon.

The bottom of the editor shows "Page 1 / 38" and navigation icons.
